

To fend off enemies, the **ENTEROCTOPUS DOFLEINT** will release a cloud of black ink! the ink is composed of highly concentrated melanin, which is initially red but appears darker when more concentrated

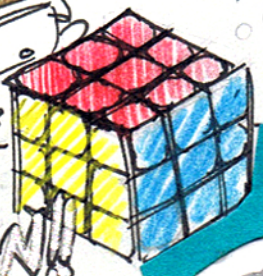

Billy, where is your math homework?!

Did you know? melanin is also the primary determinant of your skin color!

RUN!!

The **ENTEROCTOPUS DOFLEINT** is also **super smart!**

it has the most complex brain of all invertebrates! it solves problems through trial & error and pattern observation

Wow!!
