Peanut Sniffing Dogs

The answer to peanuts?

ALLERGIES, so severe they are unable to go to birthday parties or get library books.

HAPPY BIRTHDAY!

* even strangers in the same room

* Sniffing out uncooked pills, food, dust, etc.

This duty would put the dog between domesticated and wild. The dog would not have as luxurious of a life. It would be duty and reward system.

Outcome:
It would be an amazing opportunity for people with the allergy, and benefit animals. ~~It would not objectify~~ animals, because they perform similar task to a human.

The other choice in reversing the peanut allergy. In a way this is reversing nature having a peanut sniffing dog, is working with nature.

Candidates are chosen by temperament. They test their characteristics and personality, to make sure they are a good fit for the family.

Allows human with allergy, independence. The human dog relationship is hugely strengthened. Humans depend on the dogs.
