

(actual size)

A lady bird will usually lay 2 per eggs clutch...

Where to start?  
Of course, with the egg!

Baby pigeons are born:

- a. black
- b. red
- c. bright yellow!

If a pigeon doesn't respond to you, consider calling it a "rock dove" instead ...

It sounds nicer and is just as correct.

OR:

*"Columba livia"*

would work well too, if you want to be scientific & poetic about it at the same time. It means "blue diver" which indeed pigeons are.

That is what Kurt, treasurer of a Chicago pigeon racing organization, has said...

In 2004 the city banned: "importing, carrying owning, transporting, selling, or keeping pigeons."

(a Federal Court of Appeals upheld this in 2007)

And while Chicago may be one of the only cities to ban pigeons as pets, some some have even tried to outlaw **feeding** them. A proposal made December 13, 2007 suggested a fine as high as **\$1000!**

Sadly & coincidentally, the city's most famous feeder, Joseph 'pigeon man' Zeman of Lincoln Square died six days later...

For Charles Darwin, pigeons were very important...

Indeed, his *Origin of Species* and theory of evolution owes much to these feathered friends!

Who of us know the city better than the pigeons do? The ultimate urbanite, fashion feathered & city weathered, if you don't like them then:

**DUCK!**

one's flying right above your head....
